Re: Applied Research Day at Northwestern University

Dear Dibyendu Dey,

Congratulations! It gives me great pleasure to announce that you have been awarded **Audience Favorite Award** for Best presentation entitled, "*Chip-Scale Plasmonic Bio-Sensor*" in the category of Laboratory Research in Applied Research Day organized by InNUvation. This award recognizes your outstanding research work and presentation skills.

The interdisciplinary, student-run organization InNUvation at Northwestern University was founded in 2003. InNUvation aspires to kindle the entrepreneurial spirit by providing opportunities for education and idea-exchange, thus fostering commercialization and new venture formation. An InNUvation-sponsored event like Applied Research Day was organized to exchange research and entrepreneurship ideas from various different departments at Northwestern. InNUvation is the student entry point for most of our university entrepreneurs and it acts as a portal for a variety of entrepreneurial resources on campus.

We wish you success in your future endeavors and look forward to your participation in our events next year.

Best regards,

Kevin "Gali" Baler

Co-President of InNUvation 2011-2012
Northwestern University, Evanston IL 60201
